

## darktable - Bug #10697

### Exporting up-scaled not working

11/05/2015 04:01 AM - Joe Giampaoli

<b>Status:</b>	Incomplete	<b>Start date:</b>	11/05/2015
<b>Priority:</b>	Low	<b>Due date:</b>	
<b>Assignee:</b>		<b>% Done:</b>	20%
<b>Category:</b>	Lighttable	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>	Candidate for next major release		
<b>Affected Version:</b>	2.0rc1	<b>bitness:</b>	64-bit
<b>System:</b>	Debian	<b>hardware architecture:</b>	amd64/x86

#### Description

Testing version 2 rc1 I enabled "allow upscaling" to test and it's exporting at same native resolution of original images, tested with RAW and JPEG.

Thanks

Have you set "max size" in "global options" in export to much more than image size?

OK, I see I have to put up-scaling values in both X and Y, I thought that only specifying in one it would automatically adjust the other side, is this how it's supposed to be? It would be kind of easier to just be able to specify one side. But it did work that way.

Thanks

Joe
