

darktable - Bug #10974

Lens correction before exposure

04/01/2016 11:32 AM - Roman Lebedev

Status:	Patch attached	Start date:	04/01/2016
Priority:	Medium	Due date:	
Assignee:		% Done:	70%
Category:	General	Estimated time:	0.00 hour
Target version:			
Affected Version:	git development version	bitness:	64-bit
System:	all	hardware architecture:	amd64/x86

Description

If in exposure iop you set black to != 0.0, i think vignetting correction will be wrong.
(Assuming that mode = correct in lens correction)
