

darktable - Bug #11455

Redmine issue template.

01/13/2017 10:20 AM - Roman Lebedev

Status:	New	Start date:	01/13/2017
Priority:	Critical	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	2.6.0	bitness:	64-bit
Affected Version:	git master branch	hardware architecture:	amd64/x86
System:	all		

Description

If it is possible, when tracker = camera support (FIXME: or always?), the issue description should contain a text about raw.pixls.us Something like:

```
Please visit raw.pixls.us and make sure that we have all the samples for your camera under CC0 license!
```

History

#1 - 01/13/2017 10:20 AM - Roman Lebedev

- Tracker changed from Bug to Feature
- Project changed from darktable to website

#2 - 01/13/2017 11:30 AM - Tobias Ellinghaus

I can't see any setting for a default text or any message to be shown.

#3 - 10/27/2017 11:48 PM - Roman Lebedev

- bitness set to 64-bit
- hardware architecture set to amd64/x86
- System set to all
- Affected Version set to git master branch
- Target version set to 2.4.0
- Priority changed from Low to Critical
- Subject changed from Camera support issue template to Redmine issue template.
- Project changed from website to darktable
- Tracker changed from Feature to Bug

This **needs** to happen before rc.

#4 - 11/13/2017 05:53 PM - Rafa G.

I think "Issue Templates"[1] plugin could be useful for this case. It seems to be updated and well documented²

[2] https://www.r-labs.org/projects/issue-template/wiki/About_en

#5 - 12/24/2017 01:20 PM - Roman Lebedev

- Target version changed from 2.4.0 to 2.6.0

#6 - 12/30/2017 10:58 AM - Roman Lebedev

Up.

#7 - 09/23/2018 01:18 PM - Roman Lebedev

If this is not going to be resolved i might be forced to move the shop elsewhere.

#8 - 11/29/2018 02:58 PM - Roman Lebedev

```
[00:17:44] <LebedevRI> houz, hanatos: while most interested parties are present, i would like to once more highlight https://redmine.darktable.org/issues/11455#note-7
[00:18:23] <houz> i still don't know how to do that
[00:19:40] <LebedevRI> just saying
[00:29:22] <hanatos> i have no clue about redmine. or issue tracking or development practices in general..
[00:29:28] <hanatos> does github support such features?
[00:30:26] <LebedevRI> https://blog.github.com/2016-02-17-issue-and-pull-request-templates/
[00:32:16] <hanatos> aha! fwiw i'm not opposed to moving issue tracking to another place, such that repo and issues would be in one place.
[00:46:15] <LebedevRI> well, that sounds better than what i have wrote in that comment
```

#9 - 12/11/2018 07:32 PM - Pascal Obry

Great, I am also in favor of using GitHub issues. That would ease my work too to have all at the same place.

@hanatos, can you activate the issue tracker on our GitHub to start playing with it?

It is easy to activate it, but should there be a [migration] plan first?
Also, what about the existing redmine issues?

#11 - 12/11/2018 09:10 PM - Pascal Obry

Well, we can keep the Redmine open and work on the issues there but without allowing creating new issues.

#12 - 12/25/2018 12:58 PM - Roman Lebedev

Please do ideally make a decision soon.

Having two issue trackers is even much worse than having one broken issue tracker.

Having two issue trackers is even much worse than having one broken issue tracker.

Were there any further thoughts here? Which one is to stay?

Can the creation of new issues be at least disabled on the other one?
