

darktable - Bug #11938

Canon EOS 6D Mark II - RAWs can't be loaded to dark table

01/15/2018 10:11 PM - Edgar Scherleitner

Status:	Closed: invalid	Start date:	01/15/2018
Priority:	Low	Due date:	
Assignee:		% Done:	0%
Category:	Darkroom	Estimated time:	0.00 hour
Target version:	2.6.0	bitness:	64-bit
Affected Version:	2.2.5	hardware architecture:	amd64/x86
System:	Mac OS X		

Description

Can't use darktable with my new 6D Mark II (firmware 1.0.3): RAWs can be loaded to the light table and be viewed there, but errors come if I want to open them for working in the darkroom.
Error is in most cases: "Konnte Weißabgleichsdaten der Kamera nicht aus xxxx.CR2 lesen" -> obviously the white balance data can't be read. All my RAWs are affected.
I am using the latest German darktable mac-version 2.2.5.
Before I worked with a Canon 7D and darktable worked just fine.

History

#1 - 01/15/2018 10:13 PM - Roman Lebedev

- Status changed from New to Closed: invalid

That camera is only supported in 2.4.0, not in 2.2.x

#2 - 01/18/2018 08:45 PM - Roman Lebedev

- Target version set to 2.6.0
