

darktable - Bug #11946

Presets with '<' in their names are unusable.

01/18/2018 07:47 AM - August Schwerdfeger

Status:	Fixed	Start date:	01/18/2018
Priority:	Low	Due date:	
Assignee:		% Done:	100%
Category:	General	Estimated time:	0.00 hour
Target version:	2.6.0	bitness:	64-bit
Affected Version:	git master branch	hardware architecture:	amd64/x86
System:	all		

Description

If a preset is saved with a name containing the less-than character (<), it becomes unusable. Trying to select such a preset is a no-op. Manually entering the database and removing the '<' with an UPDATE command restores the expected behavior.

I have confirmed this on Darktable 2.2.5, 2.4.0, and the master branch (commit 95b1669).
