I pulled the latest from git and also updated submodules and I can read RW2 files from Panasonic DC-G9.

The previous time I built it I don't believe I updated the git submodules so that may have been the cause.

cheers

<https://redmine.darktable.org/issues/12026#change-34987> is relevant to this. There were some burst mode pics that Darktable was not handling.
