

darktable - Bug #12087

B&W raw file (RAF)

03/22/2018 08:01 PM - Peter M

Status:	Closed: invalid	Start date:	03/22/2018
Priority:	Low	Due date:	
Assignee:		% Done:	0%
Category:	Lighttable	Estimated time:	0.00 hour
Target version:	2.6.0	bitness:	64-bit
Affected Version:	2.4.1	hardware architecture:	amd64/x86
System:	Windows		

Description

For a while I had Fuji GFX50s camera and made few shots. Viewing B&W RAF files in lighttable are B&W. In darkroom the are full color. Shouldn't lighttable also show them in color? Photos with added grain (camera settings) have that grain in jpg and are without grain viewed as RAW - that is obvious, I think that RAW files should also be in color.

Viewing B&W RAF files in lighttable are B&W. In darkroom the are full color.

Which means, lighttable was showing the embedded EXIF thumbnail.

Shouldn't lighttable also show them in color?

See https://www.darktable.org/usermanual/en/preferences_chapter.html#gui_options

"don't use embedded preview JPEG but half-size raw"

Photos with added grain (camera settings) have that grain in jpg and are without grain viewed as RAW - that is obvious, I think that RAW files should also be in color.
