darktable - Bug #12144

symbol in lighttable rotates 180 not 90 degrees

04/15/2018 07:05 PM - Frank Jäger

Status:	New		**Start date:**	04/15/2018
Priority:	Low		**Due date:**	
Assignee:			**% Done:**	0%
Category:	Lighttable		**Estimated time:**	1.00 hour
Target version:	2.6.0			
Affected Version:	2.4.2		**bitness:**	64-bit
System:	Ubuntu		**hardware architecture:**	amd64/x86

Description

Some of my pictures are not from a digicam but from scanning slides in JPG-Format. There are no exif-data inside for orientation.
All slides are scanned in a batch-mode in the same orientation (landscape) allthough some are taken in portrait.
Half of them I have to rotate for 90 degrees.
Doing the rotation for a single picture in darkroom whith module "orientation" is OK.

But doing the rotation in lighttable "selected images" with the rotate-symbol (CW/CCW) dont work correkt. The first click rotates about 180 degrees. I have to use the other symbol to rotate it back. This second click rotates about 90 degrees. Its the same for a single picture or a bulk auf pictures.

I would like to rotate a bulk of pictures for 90 degrees with ONE click.

Works for me. Please upload a sample image where it fails.

#2 - 04/23/2018 08:32 PM - Frank Jäger

I can't reproduce the error with a fresh copied and fresh imported jpeg (upload sample).
It seems, the error occur only with pictures that are imported 3 years ago (but not developed until now).
Maybe the error was only in an old version of darktable.

#3 - 05/07/2018 07:59 PM - Frank Jäger

- File dia_f397_b01.jpg.xmp added

- File dia_f397_b01.jpg added

I uploaded a sample (jpg + xmp).
Scanned and imported 2016-08.
Last edited 2017-05, but only tagging and rotation in lighttable-mode has been done. Never opened in darkroom before.

When opening in darkroom the top of history-stack is a final rotation, done in lighttable-mode of a previous version of darktable.
But **position in history-stack is not on top** but one step below.
Positioning on top of history will work.

Working with rotation in lighttable-mode will add another rotation on top AND do the unvisible history-top-rotation. This resultes in a 180°-rotation.
