Description

Hello

First of all, I love your programme.

Today, I've tested it the second time and had some struggles saving the images.

It didn't work and there was a pop-up telling me the programme would be closed after clicking okay.

There also was a path to a .txt document.

This notification came several times, I think i tried (and failed) for about 5 times or more.

I have added the .txt files and hope that you can handle those numbers and codes better than me to whom these signs don't mean anything.

Thanks for your help,

Jessica

is it may be possible to find a solution before 20th of June 2018?

#2 - 05/28/2018 10:40 PM - Acissej Retlaw

Just found the mistake: when exporting data, on the bottom right you can choose a maximum for height and width. The values I typed in were to big.
