

darktable - Bug #12214

Can't use "find location"

05/29/2018 01:57 AM - Benoit Brummer

Status:	New	Start date:	05/29/2018
Priority:	Low	Due date:	
Assignee:		% Done:	0%
Category:	Map / Geolocation	Estimated time:	0.00 hour
Target version:			
Affected Version:	git master branch	bitness:	64-bit
System:	other GNU/Linux	hardware architecture:	amd64/x86

Description

"find location" on the map is broken.

When I type something and press Enter, I get "location search: Error on line 9 char 8: Element 'body' was closed, but the currently open element is 'hr'" in the terminal (and nothing happens).

The map source doesn't change anything. OSD works as expected, everything shows up on the map I just need to find it manually. Tested with "Latest commit 5e44c53 on Apr 27" and Arch Linux package darktable 2:2.4.3-1
