NIKON D3100 white balance error

07/06/2018 08:16 PM - Michail Kasoutas

Status:	Closed: won't fix	Start date:	07/06/2018
Priority:	Medium	Due date:	
Assignee:		% Done:	0%
Category:	Darkroom	Estimated time:	0.00 hour
Target version:	2.6.0		
Affected Version:	2.4.4		
Description			
I've got a lot of raw images captured with Nikon D3100. I wanted to sort out, edit and develop them in Darktable, however the photos yield "Failed to read camera white balance information". If I open the photos in darkroom, they produce the error and Darktable refuses to view any other photo until I switch to lighttable and back. This might be a duplicate of Bug #12243 .

History

#1 - 10/03/2018 07:17 AM - Aurélien PIERRE

- Subject changed from NIKON D3100 to NIKON D3100 white balance error
- Description updated
- Priority changed from Low to Medium
- Target version set to Candidate for next minor release

#2 - 10/29/2018 08:49 PM - Roman Lebedev

- % Done changed from 0 to 20
- Status changed from New to Incomplete

```
[rawspeed] (DSC_0007.NEF) rawspeed::RawImage rawspeed::RawDecoder::decodeRaw(), line 272: const rawspeed::TiffIFD *rawspeed::TiffIFD::getIFDWithTag(rawspeed::TiffTag, rawspeed::uint32) const, line 266: failed to find 1 ifds with tag 0x008c
```

Are those raws straight-out-of-camera, or were they corrupted, or modified in any way?
Did you use nikon transfer perhaps?

#3 - 10/30/2018 08:27 AM - Michail Kasoutas

I did use nikon transfer to transfer the photos from camera to the hard disk. I only added copyright metadata to the photos, no other changes were made.

#4 - 10/30/2018 09:06 AM - Roman Lebedev

- % Done changed from 20 to 0
- Status changed from Incomplete to Closed: won't fix

#5 - 10/30/2018 09:07 AM - Roman Lebedev

- Duplicates Camera Support #12354: Nikon D750: failed to read camera white balance information from filename.nef added
