

darktable - Bug #12319

Pentax K-5: wrong crop

09/09/2018 01:39 PM - Paolo Astengo

Status:	Fixed	Start date:	09/09/2018
Priority:	Low	Due date:	
Assignee:	Roman Lebedev	% Done:	100%
Category:	General	Estimated time:	0.00 hour
Target version:	2.6.0	bitness:	64-bit
Affected Version:	git master branch	hardware architecture:	amd64/x86
System:	Ubuntu		

Description

Hi shoot two images in DNG and PEF with a Pentax K-5.

The image looks differently, in particular there is a black horizontal bar in the lower part in the PEF image. Other softwares treat the PEF and DNG in the same way, not showing any differences between twos.

It would be great if you could contribute a similar set (DNG+PEF) to the <https://raw.pixls.us/>
But with normal low-iso daylight landscape-ish image.
