

darktable - Bug #12332

Deleting photos closes view

09/19/2018 10:34 PM - hevii guy

Status:	New	Start date:	09/19/2018
Priority:	Low	Due date:	
Assignee:		% Done:	0%
Category:	Lighttable	Estimated time:	0.00 hour
Target version:		bitness:	64-bit
Affected Version:	2.4.4	hardware architecture:	amd64/x86
System:	Mac OS X		

Description

Selecting an image(s) and sending it (them) to trash results in a dialogue box appearing which requests confirmation. This box expands to fit the entire screen. After entering "yes", the screen becomes fully black. Afterwards, there is no opportunity to use the GUI to return to any working darktable view. "Command Q" shuts down the program. Upon restart, the trashed image has indeed been trashed.

History

#1 - 10/09/2018 11:24 PM - hevii guy

Actually, it appears that *any* "Select photos / execute" command in lighttable view results in the same crash. It's been happening when I try to apply a Style to a group of photos.
