Description

Hi,

I am new to Darktable so it might be that the following is just me doing something wrong. But when I try to load NRW files from the new Nikon P1000 camera I get a message "failed to read camera white balance information from [filename]". Does anyone have a suggestion or is this indeed a bug?

I have tried installing the latest Nikon NRW codec but this did not make any difference. The NRW files show correctly in the Nikon software.

Ronald

Please contribute one normal raw image from that camera to <https://raw.pixls.us/>.

The file should be directly downloaded from camera's memory card via normal file manager.

DO NOT USE ANY NIKON SOFTWARE TO DOWNLOAD IT.
