

## darktable - Bug #12360

### can't get tethering to work with a7r2 and windows version

10/11/2018 02:53 PM - michael havens

<b>Status:</b>	New	<b>Start date:</b>	10/11/2018
<b>Priority:</b>	Low	<b>Due date:</b>	
<b>Assignee:</b>		<b>% Done:</b>	0%
<b>Category:</b>		<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>			
<b>Affected Version:</b>	2.4.4	<b>bitness:</b>	64-bit
<b>System:</b>	Windows	<b>hardware architecture:</b>	amd64/x86

#### Description

I set it to PC remote but it still says it can't find a connected camera.

darktable uses the libgphoto2 library to access connected cameras.

Here is the list of supported cameras:

<http://gphoto.org/proj/libgphoto2/support.php>

According to that list Alpsh 7 R II is now supported.

Try out the latest RC1 version, pls follow the process of setting up tethering on Windows here:

<https://www.darktable.org/about/faq/#faq-tethering>
