

darktable - Feature #12361

white balance

10/11/2018 03:16 PM - michael havens

Status:	Closed: invalid	Start date:	10/11/2018
Priority:	Low	Due date:	
Assignee:		% Done:	0%
Category:	General	Estimated time:	0.00 hour
Target version:	2.6.0	bitness:	64-bit
Affected Version:	2.4.4	hardware architecture:	amd64/x86
System:	all		

Description

I think it would be cool if we could take two pictures, one with a white balance card the other without. Then we could go into darktable, balance it with the card, save the settings, and then paste the settings into the picture without the card. You see I take pictures of house interiors.

History

#1 - 10/12/2018 02:36 PM - Aurélien PIERRE

- System changed from Windows to all
- Status changed from New to Closed: invalid

You can already do that: copy/paste the development between pictures and batch apply :

https://www.darktable.org/usermanual/en/history_stack.html

Or you could create a preset inside the white balance module : https://www.darktable.org/usermanual/en/module_presets.html

Or a style : <https://www.darktable.org/usermanual/en/styles.html>

#2 - 11/29/2018 02:13 PM - Roman Lebedev

- Target version set to 2.6.0
