

## darktable - Bug #12362

### Darktable does not start on Mojave (MacBook Pro)

10/12/2018 02:18 PM - Gerald Fuchs

<b>Status:</b>	New	<b>Start date:</b>	10/12/2018
<b>Priority:</b>	Low	<b>Due date:</b>	
<b>Assignee:</b>		<b>% Done:</b>	0%
<b>Category:</b>	General	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>	2.6.0	<b>bitness:</b>	64-bit
<b>Affected Version:</b>	2.4.4	<b>hardware architecture:</b>	amd64/x86
<b>System:</b>	Mac OS X		

#### Description

I have installed Darktable via DMG file as well as with HomeBrew. On both I cannot start Darktable.

After starting Darktable it starts to "jump" in the Dock, and after a while it stops jumping, and just stay in the dock. Clicking on the icon in the dock does not open Darktable. Right-click on the icon in the dock, I can only end it immediately.

Any ideas how to get it started

Hi,

I'm using Mojave as well and darktable is running great on my system. Have you tried launching darktable from Terminal to see error messages that could happen ? See manual for debug options.

Another thing to try if you use an antivirus is to disable it and try launching darktable again.

Think about saying here what happens with that as it could help developers to improve darktable for mac.
