

darktable - Bug #12370

spot removal

10/19/2018 12:01 AM - Peter M

Status:	Closed: invalid	Start date:	10/18/2018
Priority:	Low	Due date:	
Assignee:		% Done:	0%
Category:	Darkroom	Estimated time:	0.00 hour
Target version:	2.6.0	bitness:	64-bit
Affected Version:	2.4.4	hardware architecture:	amd64/x86
System:	Windows		

Description

I used spot removal with "add path" to remove road sign. One in right upper corner. On preview I got strange straight line. Included raw file, xmp and screen capture.

BTW, shouldn't spot removal take part of image close in color and texture to the spot to be removed? In Lightroom it does so, here spot used to cover blemishes is always in same direction and orientation and I have to manually search best piece to cover spot.

That's normal, your source patch overlaps the edge of the picture. You need to sample a patch **on** the picture.
