Description

Hi,

The string "sharpen" in the module title of the darkroom is never localised.
I've tested with the French (usual for me) and the Spanish locale.

I've done a bisect:

```
/usr/local/src/darktable/darktable-2.5.0/ git bisect bad
58a9aa3f68ed7cbfdff7a9ca7f6bd40241517a03 is the first bad commit
commit 58a9aa3f68ed7cbfdff7a9ca7f6bd40241517a03
Author: Pascal Obry <pascal@obry.net>
Date: Fri Oct 26 17:28:58 2018 +0200
```

Minor reformatting and style fixes.

Can't be this commit, but I confirm the issue. This is because I have fixed the context translation from:

```
_C("sharpen", "sharpen")
```

to what is used in others IOP:

```
_C("modulename", "sharpen")
```

But this does not work for this IOP! Don't know why, really strange.

I've just pushed a fix. Can you test? Thanks.

Maybe :)

I've found "tone mapping" is no more in the po file (commented out):

```
grep 'tone mapping' fr.po
```

```
msgid "tone mapping method"
```

```
#~ msgid "tone mapping"
```

Because it is not used. These are English message. Open fr.po and look, you'll see "tone mapping method" translated.

- File *tone-mapping.png* added

Yes (it appears in the grep result I submitted)

But see the attached screenshot

I see, I forgot to fix one C++ file (tonemap.cc)! My mistake should be fixed now. Thanks.
