Description

This bisects down to becf43a79b3387a9d238f93c02c7b53c315ea4e

When running darktable, even with a completely empty ~/.config/darktable, I get this assertion failure:

```
darktable: /home/moy/local/usr/src/darktable-dev/src/iop/denoiseprofile.c:262: add_preset: Assertion `len == sizeof(dt_iop_denoiseprofile_params_t)' failed.  
Aborted (core dumped)
```

According to GDB:

```
(gdb) p len  
$1 = 196  
(gdb) p sizeof(dt_iop_denoiseprofile_params_t)  
$2 = 200
```

Full backtrace attached.
