

darktable - Bug #12424

retouch: source incorrectly displayed after shift-click with orientation=portrait

11/26/2018 11:31 PM - Matthieu Moy

Status:	Fixed	Start date:	11/26/2018
Priority:	Critical	Due date:	
Assignee:		% Done:	100%
Category:	Darkroom	Estimated time:	0.00 hour
Target version:	2.6.0		
Affected Version:	git master branch	bitness:	64-bit
System:	Ubuntu	hardware architecture:	amd64/x86

Description

Steps to reproduce:

- Activate orientation and rotate the image to portrait mode
- Select "add circle"
- shift+click left on the image to select a source
- click, e.g. at the right of the source
- select "add circle" again and move the mouse to the image.

Excepted:

- The '+' showing the source location appears at the left of the mouse

Actual:

- The '+' showing the source location appears above the mouse

A bit ironic for a tool which works so well for portrait photography ;-).

History
