<b>System:</b>	Fedora/RHEL		

#### Description

Hi,  
for some times, I have problem importing RAW pictures in darktable: each time I try, it crashes.  
I've run the command "darktable -d all" in the terminal, and here is the result after opening darktable, and trying to import a .DNG file (see attached file).  
Someone on the French darktable forum told me that there might be a problem of compatibility with the fedora libraries because of this: "warning: Loadable section ".note.gnu.property" outside of ELF segments"  
I hope you can find what is wrong!  
Thanks in advance,  
Géraldine

#### History

##### #1 - 01/07/2019 11:10 PM - Roman Lebedev

- Status changed from New to Closed: upstream

<https://github.com/Exiv2/exiv2/issues/201> <- seems to be fixed in exiv2-0.27

##### #2 - 01/07/2019 11:11 PM - Roman Lebedev

- Subject changed from dt not compatible with some fedora libraries? to crash in Exiv2::Internal::resolveLens0x3f()

##### #3 - 01/07/2019 11:11 PM - Roman Lebedev

- Subject changed from crash in Exiv2::Internal::resolveLens0x3f() to crash in Exiv2::Internal::resolveLens0x3f()
