

darktable - Bug #12611

JPG Compression to email

02/27/2019 06:53 AM - David Vincent Jones

Status:	New	Start date:	02/27/2019
Priority:	Low	Due date:	
Assignee:		% Done:	0%
Category:	Lighttable	Estimated time:	0.00 hour
Target version:	Candidate for next major release	bitness:	64-bit
Affected Version:	git stable branch	hardware architecture:	amd64/x86
System:	other GNU/Linux		
Description			
<p>After exporting to JPG format (95%) onto the desktop at full (0,0) resolution, if I later export to email at a lower (1500,1500) res. the compression is incorrect and I get a very large Mb. size output.</p> <p>In order to get the correctly compressed email output I need to export initially to the desktop at the lower size and then go back to email export. The correct compression is then achieved and will stay correct until I again export to the desktop at full scale..</p> <p>I have noticed this problem for some time</p> <p>darktable 2.7.0+497~g38a7407bb ... Manjaro with Arch Repos.</p>
