Description

HDR created from three CR2 raws (automatic bracketing with 2-stops step) has uncorrectable pink cast. Example image here (initial HDR without any specific tone mapping) http://lobo.jzola.org/~zola/IMG_1616-hdr.tiff. Original CR2 files here: <http://lobo.jzola.org/~zola/HDR.tar.bz2>

Cast cannot be corrected. I tested on several versions of DT post 0.9.

This ticket can be related (duplicate?) to [#8518](#).
