

darktable - Bug #8600

Create HDR does not work (canon sraw CR2, EOS 40D)

02/17/2012 09:32 AM - polgarn -

Status:	Closed: invalid	Start date:	
Priority:	Low	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	---	bitness:	64-bit
Affected Version:	git development version	hardware architecture:	amd64/x86
System:	unknown		

Description

When I select a canon RAW file (CR2, sraw, EOS 40D) and after I try to make hdr image by the create hdr button, I get an error message:
"exposure bracketing only works on RAW images". So I can't create hdr from canon raw files.

History

#1 - 10/05/2012 12:26 PM - Tobias Ellinghaus

- Status changed from *New* to *Incomplete*
- % Done changed from 0 to 20
- Affected Version set to *git development version*

Does this still happen?

#2 - 01/31/2013 10:57 PM - Simon Spannagel

- System set to *unknown*
- % Done changed from 20 to 0

Not sure about SRAW, but works for standard Canon CR2 RAW for me.
Closing.

#3 - 07/28/2013 12:10 PM - Francois Gaascht

Same problem, impossible to create HDR based on CR2 canon mRaw file with Darktable
--> "exposure bracketing only works on RAW images"

Next time I will try with true CR2 Canon Raw file.

#4 - 07/28/2013 01:16 PM - Pascal de Bruijn

This may be a more general bug/misfeature though (I doubt it's limited to the 40D)... since sRAW/mRAW aren't true RAWs, we should probably either give a clear message that only true RAWs are supported, or have special handling for sRAW/mRAW's.
