Target version:	---	bitness:	64-bit
Affected Version:	0.9.3	hardware architecture:	amd64/x86
System:			

Description

i downloaded 'Darktable-0.9.2.dmg' and installed it on my mac under snow leopard (10.6.8). when i open darktable, it shows only empty boxes instead of characters. see attached screenshot!

History

Very strange, firstly see. Could you open terminal and enter this:
cd /Applications/Darktable.app/Contents/MacOS/
./start
And post errors?

#2 - 03/05/2012 11:01 AM -utnik -

ok, just performed this start via terminal ☐ the output was:

```
_.  
Xlib: extension "RANDR" missing on display "/tmp/launch-WMAAhb/org.x:0".  
Fontconfig error: Cannot load default config file
```

```
(darktable:435): Pango-WARNING **: failed to choose a font, expect ugly output. engine-type='PangoRenderFc', script='latin'
```

```
(darktable:435): Pango-WARNING **: failed to choose a font, expect ugly output. engine-type='PangoRenderFc', script='common'  
[view_load_module] could not open /Applications/Darktable.app/Contents/MacOS/./lib/darktable/views/libcapture.so  
(dlopen(/Applications/Darktable.app/Contents/MacOS/./lib/darktable/views/libcapture.so, 9): image not found)!  
[view_manager_init] failed to load view module 'capture'
```

☐ hope that helps

Pretty much the exact same thing for me:

Xlib: extension "RANDR" missing on display "/tmp/launch-Gjjghg/org.x:0".
Fontconfig error: Cannot load default config file

(darktable:3439): Pango-WARNING **: failed to choose a font, expect ugly output. engine-type='PangoRenderFc', script='latin'

(darktable:3439): Pango-WARNING **: failed to choose a font, expect ugly output. engine-type='PangoRenderFc', script='common'
[view_load_module] could not open /Applications/Darktable.app/Contents/MacOS/./lib/darktable/views/libcapture.so
(dlopen(/Applications/Darktable.app/Contents/MacOS/./lib/darktable/views/libcapture.so, 9): image not found)!
[view_manager_init] failed to load view module 'capture'

#4 - 08/10/2012 06:14 PM - Simon Spannagel

- *Affected Version set to 0.9.3*

- *Status changed from New to Closed: invalid*

parafin is currently working on the OSX port. The font issues might already be solved with [14e4a3516ea8c8ca69833697327ba40250d537ae](#)
This applies to the git development version only.

Closing this ticket since we're not supporting 0.9.x anymore.
