

darktable - Feature #8677

"import from camera" doesn't show thumbnails

04/24/2012 04:02 AM - xxvelcrar -

Target version:	---	bitness:	64-bit
Affected Version:		hardware architecture:	amd64/x86
System:			

Description

It would be extremely helpful if the "import from camera" feature showed thumbnails for RAW files in the listing.

If this is supposed to happen (it shows jpegs!) then perhaps there's some configuration I have set wrong.

boring details:

Running Darktable 1.0 (Debian version 1.0-2) importing from Nikon D80 using SD card reader built into a Thinkpad x220.

This is a problem of libgphoto2. I don't think there is anything that can be done on our side. Maybe Henrik can chime in?
