

darktable - Bug #9059

Backup on import doesn't seem to work.

11/19/2012 12:06 AM - Daryll Strauss

Status:	New	Start date:	11/19/2012
Priority:	Medium	Due date:	
Assignee:		% Done:	0%
Category:	Lighttable	Estimated time:	0.00 hour
Target version:		bitness:	64-bit
Affected Version:	1.0.5	hardware architecture:	amd64/x86
System:			
Description			
I selected the advanced option to make a backup copy of the images to my file server. When I import, that seems to be completely ignored.			
Fedora Linux version.

Same issue here. not really sure what it is trying to do. Does DT scan every mounted disk for a folder called X, regardless of mount point, or is it only looking for a specific mount??

I am on kubuntu 13.04

Also there is a spelling error in the tooltip for the destination name - mounter should be mounted!! @ line401 in darktable / src / gui / camera_import_dialog.c

#2 - 05/26/2013 09:18 PM - jim lott

Just realised that if the warning box is enabled, no warning is given, so are the files being copied somewhere?? I can cant find a location if they are.
