

darktable - Bug #9180

Importing from mass storage camera doesn't group

01/10/2013 08:33 AM - Tomi Pieviläinen

Status:	Incomplete	Start date:	01/10/2013
Priority:	Low	Due date:	
Assignee:		% Done:	20%
Category:	Darkroom	Estimated time:	0.00 hour
Target version:		bitness:	64-bit
Affected Version:	git development version	hardware architecture:	amd64/x86
System:	unknown		

Description

When the memory card of the camera is inserted into a reader, it's shown under the devices. If the import is done via that, and not via the "import folder" tool, automatic grouping of raw+jpg does not work.

Same happens with 1.1.1 and the latest unstable from ppa:pmjdebruijn/darktable-unstable.

History

#1 - 11/15/2013 05:45 PM - Christian iuga

The automatic grouping is done is the destination file name of CR2 & JPG are the same
Can you confirm, you configure darktable import to have the same name of CR2 and JPG file ?

#2 - 11/22/2013 12:14 PM - Simon Spannagel

- *bitness set to 64-bit*
- *System set to unknown*
- *% Done changed from 0 to 20*
- *Status changed from New to Incomplete*
